

A close-up, high-angle shot of a precision metal stamping machine. The machine is dark blue and black, with various mechanical components like rollers, guides, and a cutting tool visible. A thin, metallic strip is being fed through the machine, and several small, rectangular metal stamped parts are being produced. The background is blurred, showing more of the industrial environment.

CABLEX

**Precision Metal Stamped Parts –
Engineered for Performance**

**METAL STAMPED
PARTS**

**Shaping
the Future
Together**

OUR CAPABILITIES

- Sheet metal stamping (25–250 T range)
- Material thickness: 0.15–3 mm | ferrous & non-ferrous metals
- Tin plating available | strip form & loose pieces
- Prototyping & functional testing
- Low- to high-volume production
- Complete in-house tool management
- Automation & robotic handling in production

COMPLEMENTARY SERVICES

DEVELOPMENT & DESIGN

IN-HOUSE TOOLSHOP

SURFACE TREATMENT

DEGREASING

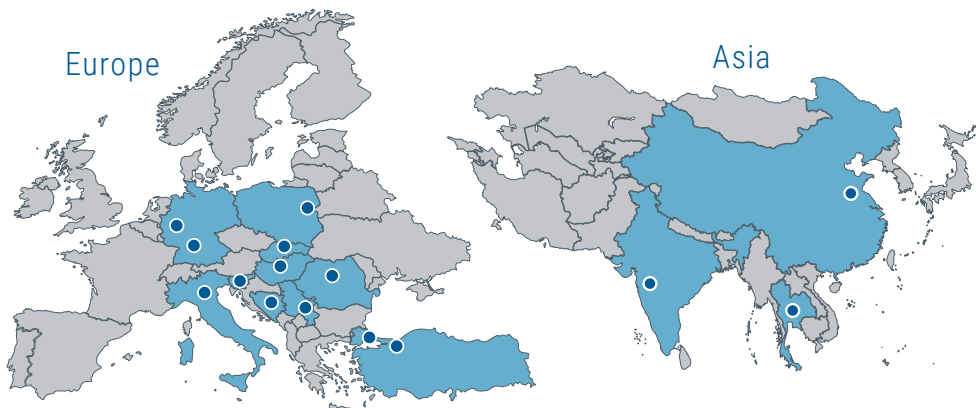

WHY CHOOSE US?

- 25+ years of experience in metal part manufacturing
- High-volume production supported by an extensive machine park
- Multi-stage progression tooling for precision & efficiency
- Complex geometries with tight tolerances & optimized use of material
- Flexible solutions: metal parts, cables, plastics, EMS & box build
- ISO-certified processes | IATF certification in progress
- We work closely with customers, from concept to completion

Let's build smarter together.

Get in touch to explore how Cablex can support your next project with its reliable metal stamping solutions.
